Caps Layer

Hold **Caps**: **direction** (right hand) × **speed** × **context** (left hand), or a **verb**. Tap Caps = Esc.

HOLD CAPS, THEN…

direction · speed · context (hold) · verb · target

HOLD TAB: OPEN TARGET

O Obsidian	**I** Ideas note	**D** to-Do note	**M** Mail	**S** Sublime	**T** Terminal here	**B** Browser window	**U** zeeguU + claude	**P** 1Pass
H Claude here	**R** Reverse search							

Tap Tab = Tab. ⌘Tab, ^Tab, ⇧Tab, ⌥Tab unchanged. H = Claude, T = a plain Terminal, in the current note's folder (Obsidian) or the window's folder (Finder); T elsewhere just opens Terminal. R in Terminal = ^R (history search).

Karabiner-Elements config: dotfiles/karabiner/karabiner.json · windows via Rectangle

THE GRAMMAR: CONTEXT × SPEED × DIRECTION

key	context	–	F · far	G · greatest
	move just HJKL	**H/L** char **J/K** line	**H/L** word **J/K** page	**H/L** line start/end **J/K** doc end/start
S	**select** move, selecting	**H/L** char **J/K** line	**H/L** word **J/K** page	**H/L** to line start/end **J/K** to doc end/start
D	**delete** tap D = ⌫	**H** ⌫ char · **L** ⌦ char **J/K** whole line	**H/L** word back / fwd **J/K** a page down / up	**H/L** to line start / end **J/K** to doc end / start
W	**window** W + C = center	**HJKL** half again: ⅔, then ⅓	tap F: maximise	**H/L** other display

Search: / in the current note or message · F + / jump to a file (Obsidian ⌘O, Sublime ⌘P) · G + / everywhere (mailboxes, vault). **'** new line without sending. **[/]** outdent / indent (⌘[/ ⌘]; in browsers ⇧Tab / Tab). Backspace only through D.

Real modifiers pass through: Caps + ⌘ + H = ⌘←.

Off: ⌘H (hide app; ⌥⌘H still works), ⌘K in Terminal (clears Claude's view).

Terminal: G + H/L = ^A/^E; delete word / to line start / to line end = ^W / ^U / ^K; D + J/K (and D + F + J/K) clears the line (^A ^K), D + G + J/K to line end / start.
